Tap on “Next” at the top

A screenshot of a mobile application's 'New Account' screen. The screen has a dark background with white text. At the top, there are three buttons: 'Cancel' (underlined), 'New Account' (bold), and 'Next' (underlined). Below the buttons are four rows of text input fields. The first row is 'Name' with the value 'John Doe'. The second row is 'Email' with the value 'johndoe@thevillages.net'. The third row is 'Password' which is empty. The fourth row is 'Description' with the value 'TheVillages.net'.

For Incoming mail server

Host Name enter: **mail.thevillages.net**

Make sure your username and password are entered

For Outgoing mail server

Host Name enter: **mail.thevillages.net**

Make sure your username and password are entered.

Tap “Next” at the top, if all information is entered correctly you will get a screen like below

A screenshot of a mobile application's mail server configuration screen. The screen has a dark background with white text. At the top, there are two rows of text input fields. The first row is 'Email' with the value 'johndoe@thevillages.net' and a blue checkmark. The second row is 'Description' with the value 'TheVillages.net' and a blue checkmark. Below these are two sections. The first section is titled 'INCOMING MAIL SERVER' and contains three rows of text input fields: 'Host Name' with the value 'mail.thevillages.net' and a blue checkmark, 'User Name' with the value 'johndoe' and a blue checkmark, and 'Password' which is empty and has a blue checkmark. The second section is titled 'OUTGOING MAIL SERVER' and contains three rows of text input fields: 'Host Name' with the value 'mail.thevillages.net' and a blue checkmark, 'User Name' with the value 'johndoe' and a blue checkmark, and 'Password' which is empty and has a blue checkmark.

Tap on “Save” on the next screen
